

Listing of Claims:

1. (Previously presented) A method of providing an electronic marketing presentation,
comprising:
renting out a marketing object container to a first party, wherein the marketing object
5 container is configured to be presented in a web page associated with a second
party;
selecting, by the first party, a marketing attribute configured to describe what marketing
objects can be received by the marketing object container; and
sending the selected marketing attribute to be automatically associated with the marketing
10 object container.
2. (Original) The method of claim 1, further comprising selecting a marketing object for
association with the marketing object container.
3. (Original) The method of claim 1, further comprising sending a selected marketing object for
15 association with the marketing object container.
4. (Original) The method of claim 3, further comprising renting out a second marketing object
container to the first party, wherein the second marketing object container is presented
in a second web page associated by a third party, and wherein the selected marketing
20 object is automatically associated with the second marketing object container.
5. (Previously presented) The method of claim 1, further comprising renting out a second
marketing object container to the first party, wherein the second marketing object

container is presented in a second web page associated with a third party, and wherein the selected marketing attribute is automatically associated with the second marketing object container.

5 6. (Previously presented) A method of providing an electronic marketing presentation,

comprising:

providing a marketing object container associated with a first party;

associating the marketing object container with a website, wherein the website is

associated with a second party; and

10 automatically associating a marketing attribute with the marketing object container.

7. (Original) The method of claim 6, further comprising selecting at least one marketing object for insertion in the marketing object container, wherein the first party selects the at least one marketing object.

15

8. (Original) The method of claim 6, further comprising a second marketing object container associated with the first party, wherein the second marketing object container is associated with a second website associated with a third party.

20 9. (Previously Presented) The method of claim 8, wherein associating the marketing attribute with the marketing object container also automatically associates the marketing attribute with the second marketing object container.

10. (Original) The method of claim 8, wherein selecting at least one marketing object for
insertion in the marketing object container also automatically associates the at least one
marketing object for insertion in the second marketing object container.

5 11. (Original) The method of claim 6, wherein the second party provides a service to a plurality
of parties and at least some of the parties are unrelated, and the unrelated parties are
only allowed access to their own marketing presentation.

12. (Original) The method of claim 6, wherein the second party receives a commission based on
10 revenue generated by the first party's marketing presentation.

13. (Canceled)

14. (Original) The method of claim 6, wherein the second party receives fees from the first
15 party for hosting their marketing presentation.

15. (Previously presented) A system of providing an electronic marketing presentation,
comprising:
a processor configured to provide a marketing object container associated with a first
20 party; the processor also being configured to facilitate associating the marketing
object container with a website, wherein the website is associated with a second
party; and facilitating automatically associating a marketing attribute with the
marketing object container; and

a memory coupled with the processor, wherein the memory is configured to provide the processor with instructions.

16. (Previously presented) A computer program product for providing an electronic marketing

5 presentation, comprising:

computer code providing a marketing object container associated with a first party;

computer code associating the marketing object container with a website, wherein the website is associated with a second party;

10 computer code automatically associating a marketing attribute with the marketing object container; and

a computer readable medium that stores the computer codes.

17. (Original) The computer program product of claim 16, wherein the computer readable

medium is selected from the group consisting of CD-ROM, floppy disk, tape, flash

15 memory, system memory, hard drive, and data signal embodied in a carrier wave.

18. (Previously presented) The method of claim 1, wherein the marketing objects that can be received by the marketing object container include a marketing object of type ad banner.

19. (Previously presented) The method of claim 1, wherein the marketing attribute is further

20 configured to characterize the marketing object container as being configured to receive a marketing object having a cross sell feature.

20. (Previously presented) The method of claim 1, further including selecting a marketing object for display in the marketing object container, the selection being responsive to the marketing attribute.

5 21. (Previously presented) The method of claim 20, wherein the selection is further responsive to a visitor attribute.

22. (Previously presented) A method of providing an electronic marketing presentation, comprising:

10 renting out a marketing object container by a first party, wherein the marketing object container is presented in a web page associated with a second party, and the marketing object container is configured to be characterized by a marketing attribute;

selecting the marketing attribute to characterize the marketing object container as having
15 a campaign type;

sending the selected marketing attribute for association with the marketing object container; and

automatically associating the marketing attribute with the marketing object container.

20 23. (Previously presented) The method of claim 22, wherein the campaign type is a promotion.

24. (Previously presented) The method of claim 22, wherein the campaign type is an up sell, a sale, or a new product introduction.

25. (Previously presented) A method of providing an electronic marketing presentation,
comprising:

renting out a first marketing object container of a first party, wherein the first marketing

5 object container is presented in a web page associated with a second party, and
 the first marketing object container is configured to be characterized by a
 marketing attribute;

selecting the marketing attribute to characterize the first marketing object container as
 having a relationship with a second marketing object container;

10 sending the selected marketing attribute to be associated with the first marketing object
 container; and

automatically associating the selected marketing attribute with the first marketing object
 container.

15 26. (Previously presented) The method of claim 25, wherein the relationship between the first
 marketing object container and the second marketing object container includes a content
 detail feature or an item detail feature.

27. (Previously presented) The method of claim 25, wherein the relationship between the first
20 marketing object container and the second marketing object container includes a category
 list feature or a search results feature.

28. (Currently Amended) A method of providing an electronic marketing presentation,
comprising:

renting out a marketing object container of a first party, wherein the marketing object
container is presented in a web page associated with a second party, and the
marketing object container is configured to be characterized by a marketing
attribute;

selecting a marketing attribute to characterize the marketing object container as having a
~~timing or priority of display of a marketing object within the marketing object~~
container;

sending the selected marketing attribute to be associated with the marketing object
container; and

automatically associating the marketing attribute with the marketing object container.

29. (Currently Amended) The method of claim 28, wherein the selected marketing attribute is

further configured to characterize timing or priority of display of a marketing object
within the marketing object container ~~includes a time period for displaying the marketing~~
~~object on a daily, weekly, or monthly basis.~~

30. (Previously presented) A method of providing an electronic marketing presentation,

comprising:

providing a first marketing object container configured to be presented in a web page and
to be characterized by a marketing attribute;

selecting the marketing attribute to characterize a marketing campaign of the first
marketing object container;

sending the selected marketing attribute to be associated with the first marketing object
container; and

5 automatically associating the selected marketing attribute with the first marketing object
container.

31. (Previously presented) The method of claim 30, wherein the marketing attribute is configured
to describe what marketing objects can be received by the marketing object container.

10

32. (Previously presented) The method of claim 30, further including selecting a style template
responsive to the marketing attribute, and identifying a visitor to the web page, after
selecting the style template.

15 33. (Previously presented) The method of claim 30, wherein the marketing campaign is an on
sale marketing campaign.
